

Ring lights

Ring lights provide a uniform and shadow-free lighting. A diffuser (removable) for homogeneous light is included.

In order to avoid reflection, some ring lights can be used in combination with polarization filters.

Brackets are included (no. SXX3 010213, for details see lighting head brackets).

The standard light beam angle is 12°. Custom adjustment from 0° to 40° on request.

The special RGB lights are built with high-power three-chips LEDs red, green, and blue, enabling the use of each color separately or in combination. White light can be achieved by setting each channel to the same intensity level.

Color information

Replace "X" in order number by one character ¹⁾	Color	Wavelength
H	Red	617 nm
W	White	
R	IR	880 nm
B	Blue	465 nm
G	Green	520 nm
U	UV	395 nm

¹⁾ Example for red ring light: SAH3 1078
