

PRODUCT FEATURES

ODDM-3XT-LPKIT-FI Kit Includes:
2 - Linear Polarizer Inserts

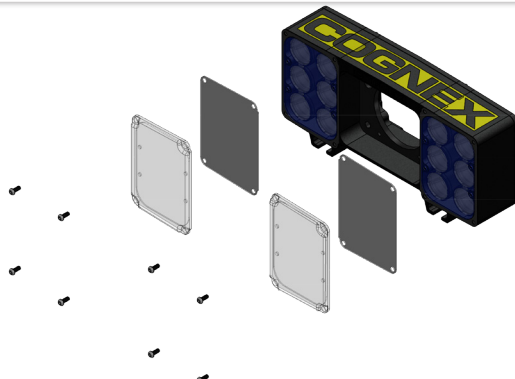

PRODUCT SPECIFICATIONS

Polarizer Transmittance	38% (Single Polarizer)
Polarizing Efficiency	99.98%
Wavelength Range	~ 400 nm – 700 nm
Polarizer Thickness	0.178 mm (0.007")
Torque Specification	8 N-cm (0.8 Kg - cm)

A linear polarizer has a typical transmission of 38% while blocking 62% of the light not in the polarization plane.

INSTALLATION GUIDE

Installing the Linear Polarizer:

- Remove screws from lens cover and remove the cover.
- Push polarizer into lens cover cavity. Align holes with pins.
- Replace cover and screws.
- Tighten screws back onto light.

Torque specification: 8 N-cm (0.8 Kg - cm)
